

The Good Life

An empty water bottle, a piece of material 8x the length of the water bottle, tape, 2x 50cm sticks, string, masking tape, tissue paper, glue, scissors.

Wrap the water bottle with the making tape. This makes it easier to cover the bottle with the tissue paper.

Cut four pieces of string to about 30cm long

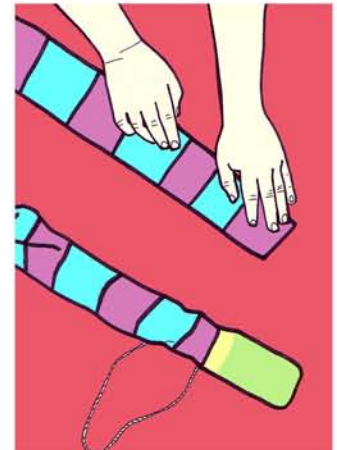

Tie one of the pieces of string around the bottle.....

Cover the bottle with the tissue paper and watered down P.V.A Glue. (1 part water to 3 parts glue)

Measure the material around the bottle and then cut to size. Make sure the length is at least 8x longer than the bottle.

Fold the material into a long tube.

The Good Life

Tape one end of the material around the bottle.

Draw a pair of eyes on a piece of paper.

Cut them out and stick them on to the bottle.

When the tissue paper is dry then draw on the nostrils and any other detail.

Tie the second piece of string onto the 'tail' end of the material

Tie the third piece 1/4 of the way down the material, the fourth 3/4 of the way down the material.

Overlap the sticks and attach the string.

Wiggle the snake.
