

The Good Life

Plant sticks, hole punch, pliers, scissors, string, sellotape thin bin bags, paper template.

Unfold and smooth out the bin bag onto a flat surface.

Cut out the paper template.

Put the long edge of the template against the fold of the bin bag. Draw around it with permanent marker.

Cut out.

Open up the kite and smooth out.

The Good Life

Place the garden sticks on the kite and cut to size.

Sellotape the sticks to the kite.

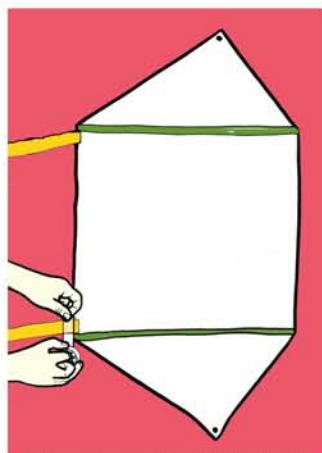

Put two layers of sellotape on the corners of the kite.

Use a hole punch to make a hole on each corner. The sellotape makes the hole stronger.

Cut a 2 metre length of string and tie each end through the holes.

Cut two long strips off the bin bag. Sellotape these to the bottom. This will help the kite to point in the right direction.

Tie a 10 metre length of string half way along the 2 metre length of string.

Your kite is now ready to go.
